

Regalead is the UK's leading manufacturer of self adhesive lead profile, producing in excess 30 million metres per year - a product that gives so many creative options for doors, windows, cabinets and craft applications.

The wide selection of profiles available have a high performance acrylic, pressure sensitive adhesive which makes them suitable for permanent application to both interior and exterior glass surfaces. They can be used for single and double glazed units.

But what makes RegaLead such an attractive product to use is the range of finishes and sizes available - 13 colours options as shown below and sizes from 2mm to 18mm wide.

- **2mm and 3mm** leads are supplied 'kiss cut' in easy to split double strands. These are commonly used for fine detailed applications.
- **3.5mm and 4.5mm** are popular widths for use with Stained Glass Art Film and for detailed work.
- **6mm** is the perfect width for leading around bevels.
- **9mm and 12mm** are used mainly for straight line leading styles or as a border.
- **15mm and 18mm** are popular for creating rectangular lead styles on larger areas or for backing-up of face-fixed Georgian/muntin bars.
